Administration Bureau 16

Personnel Highlights 19

Performance Indicators 21

The City of Tacoma Fire Department was legally established by Ordinance No. 256 in July 1889.

EXECUTIVE SUMMARY

The Tacoma Fire Department (TFD) plays a vital role in serving the community. Through the collaborative efforts of our firefighters and administrative staff, in coordination with city management, other City of Tacoma departments, elected officials, neighboring fire departments, and community members, we remain committed to meeting the ongoing challenges inherent in maintaining a top-tier municipal fire department. Together, we ensure that TFD continues to provide essential services and support to our community.

KEY OBJECTIVES AND HIGHLIGHTS

Throughout 2023, we continued expanding our Basic Life Support program, adding one full-time and three peak-time aid cars (ambulances) to our deployment. We were grateful to the voters for passing an EMS levy Lid lift, which will provide funding to bolster our emergency medical services over the next six years. Finally, we worked with an outside consulting company to complete a Standard Cover Study that provided several recommendations to improve the department's performance for the future.

Other highlights included:

- Hired two recruit firefighter classes.
- The American Heart Association recognized us with a Gold Plus EMS Mission Lifeline award for our demonstrated success in meeting the latest research-based standards for resuscitation care.
- Trained over 700 participants at our free annual community CPR training event.

CPR Sunday October 9, 2023

FACTS AND FIGURES

The following is the department incident call data by complete reports for 2023 and all dispatched incidents for the last five years.

	2023	2023	2023	2023	2023	2023	2023	2023	2023	2023	2023	2023	2023
Type	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total
1 - Fire	202	176	203	178	193	259	531	330	254	134	178	148	2786

Dispatched Incidents

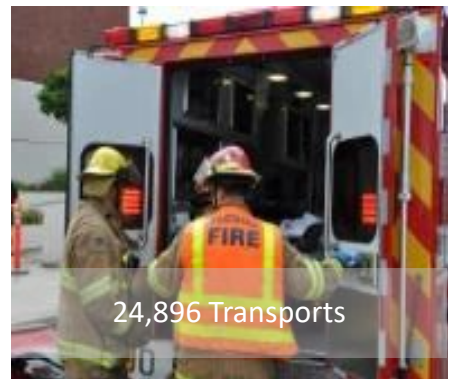

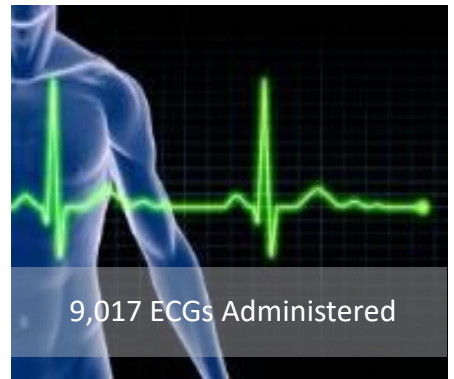

Dispatched	<u>2018</u>	<u>2019</u>	<u>2020</u>	<u>2021</u>	<u>2022</u>	<u>2023</u>	<u>Total</u>
Fire	1,780	1,649	1,966	2,941	3,668	2,786	14,790
EMS	38,761	39,343	37,450	43,075	40,521	38,548	237,698
Other*	7,722	8,604	6,998	7,206	4,983	10,165	45,678
Grand Total	48,263	49,596	46,414	53,222	49,172	51,499	298,166

*Examples of "other" incidents include hazardous conditions, technical rescue, hazardous materials, and good intent/service calls.

EMERGENCY MEDICAL SERVICES (EMS)

In 2023, our community members called 9-1-1 over 51,000 times to request help. TFD dispatched over 90,000 companies to assist with those incidents. One company is a fire engine or ladder truck staffed with three firefighters/EMTs, a medic company with two firefighter/paramedics, or an aid company with two firefighter/EMTs.

What types of problems did we help with? The majority were emergency medical situations. Last year, we assessed and treated over 38,000 people. The top five reasons for requesting help were getting hurt, feeling sick, breathing problems, heart issues, and losing consciousness.

FIRE

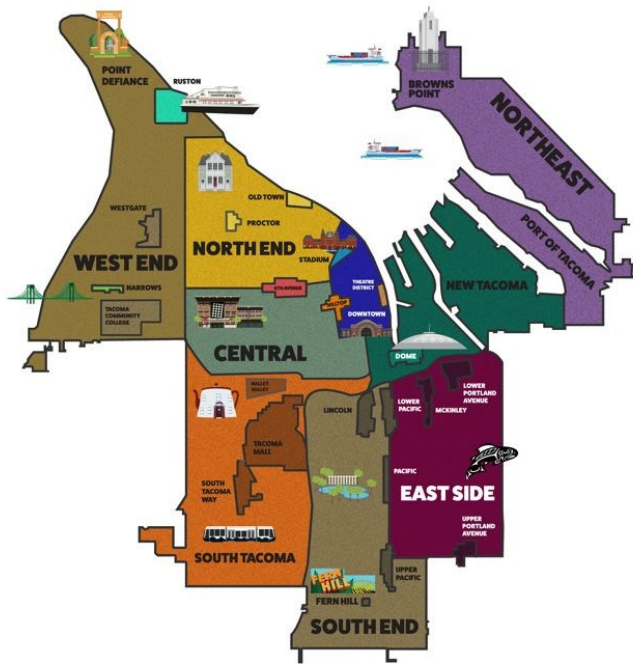

In 2023, we responded to over 2,700 fires—an average of seven times daily. Most of our fires occurred outdoors (e.g., grass, brush, and trees) and in the summer months, and several were associated with encampments throughout our response area.

COMMUNITY OVERVIEW

COMPOSITION

The City of Tacoma was incorporated in 1884. From its humble origins of less than 1,000 residents, the city has grown to over 220,000 today. TFD also provides contracted emergency response to the cities of Fircrest and Fife, as well as Pierce County Fire District #10, for an additional population of over 20,000.

Like many established communities, Tacoma is a mixture of old and new. Recently constructed high-rise buildings in the downtown core contrast with century-old, single-family residential neighborhoods. The city’s economic base comprises various industries: healthcare, education, retail, manufacturing, and the Port of Tacoma.

2023/24 BUDGETED RESOURCES

Budgeted Personnel

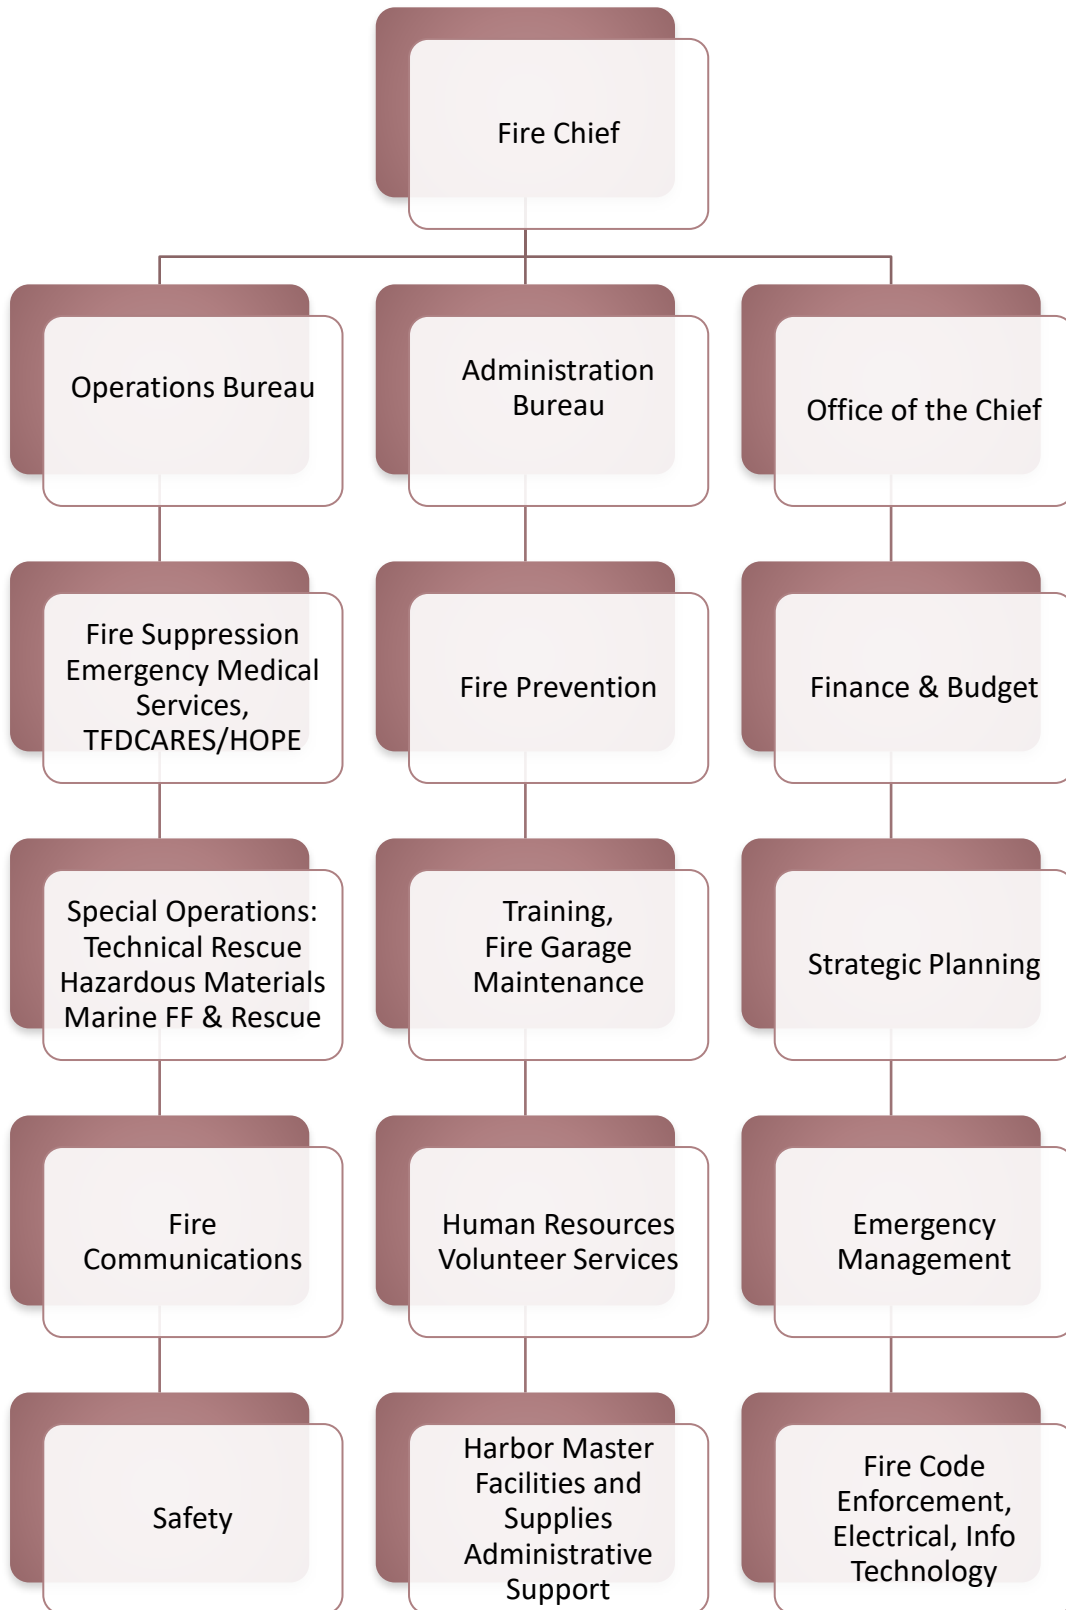

- 467 Commissioned Personnel
- 68 Non-Commissioned Personnel
- 535 Total Budgeted Positions
- 83 Minimum Daily Fire Station Staffing Level

Stations, Companies, Apparatus

- 17 Fire Stations
- 16 Engine Companies
- 4 Ladder Companies
- 5 Medic Companies
- 4 Aid Companies (full-time)
- 3 Aid Companies (peak-time)
- 1 Safety Officer
- 1 EMS Officer
- 3 Battalion Chiefs
- 1 Technical Rescue Unit, (cross-staffed)
- 1 Hazardous Materials Unit, (cross-staffed)
- 2 Fireboats, (cross-staffed)

2023 ORGANIZATIONAL CHART

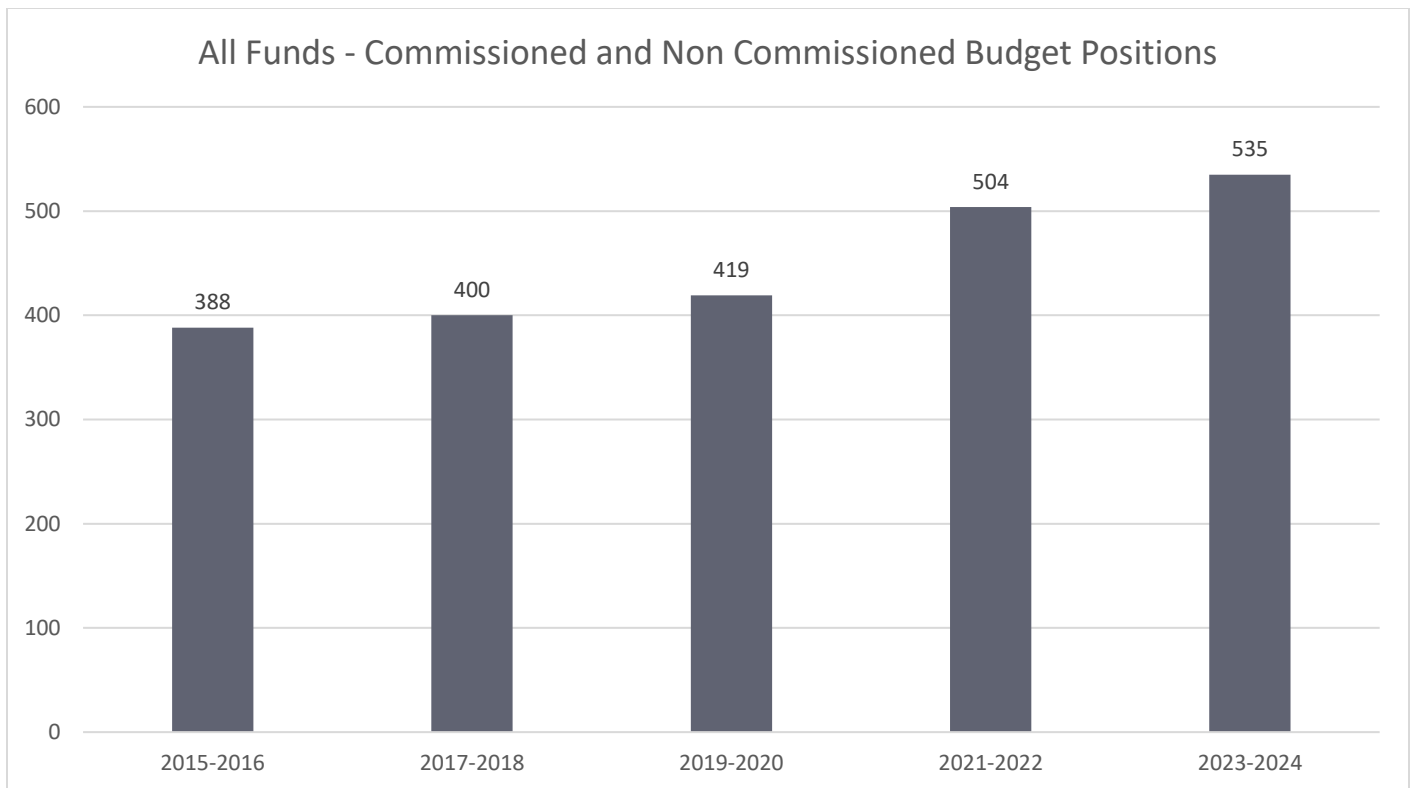

OFFICE OF THE FIRE CHIEF

BUDGET, FINANCE, STRATEGIC PLANNING, EMERGENCY MANAGEMENT, INFORMATION TECHNOLOGY, ELECTRICAL

Under the leadership of Fire Chief Toryono Green, responsibilities in the section include the development and maintenance of the biennial budget and providing financial oversight, emergency management for the City of Tacoma, fire code and plan review, information technology services, electrical maintenance and the development and implementation of fire departmental priorities, performance measures, and policies and procedures.

BUDGET AND FINANCE

Preliminary Final expenses for the Fire Department totaled \$121,328,307 in 2023. This was a \$14,465,948 increase over the previous year, primarily due to the expansion (personnel, apparatus, and equipment) for the basic life support medical transport program and the creation of the City’s co-responder program (HOPE) for behavioral health support.

EMERGENCY MANAGEMENT

In 2023, emergency management staff provided disaster preparedness, plan development, and training to community members, businesses, and government to increase our ability to survive natural and manmade disasters.

Emergency management staff maintained the readiness of the City Emergency Coordination Center, and the Emergency Management 24/7 Duty Officer monitored and coordinated activity surrounding inclement weather, flooding, and hazardous material incidents throughout the City of Tacoma.

Community Emergency Response Team (CERT) Training.

INFORMATION TECHNOLOGY

The TFD Information Technology group includes five senior analysts, one analyst, and two computer support technicians. IT personnel support various systems and hardware, including dispatch systems, applications, databases, e-mail, and web servers.

FIRE ELECTRICIANS

The TFD Electrical Maintenance Division consists of a supervisor and four state-licensed electricians involved in various functions: maintaining communication equipment, making electrical repairs and upgrades, maintaining the City's fiber optic network loop, and several other large-scale projects.

OPERATIONS BUREAU

WHO WE ARE

The Operations Bureau's responsibility is to provide fire, medical, hazardous materials, marine, and technical rescue services within our response area. Under the leadership of Deputy Chief Lee Law, this bureau includes personnel who staff our stations: three battalion chiefs, 16 engine companies, five medic companies, four ladder companies, eight aid companies (three operate during peak hours), one safety officer, and one EMS supervisor. Operations personnel also cross-staff two fireboats, one hazardous materials team, and one technical rescue team. In 2023, the minimum staffing was 83 fire station personnel 24 hours a day, seven days a week, 365 days a year. This bureau includes Emergency Medical Services, Special Operations Division, Safety Division, and Tacoma Fire Communications.

WHAT WE DO

Firefighters in the Operations Bureau respond to emergency requests from the public for:

- Fire—residential and commercial structure, high-rise, vehicle, grass, and brush.
- Medical Aid—from general feelings of being sick to trauma, falls, heart attacks, and strokes.
- Technical Rescue—vehicle, water, confined space, industrial building collapse, high-angle rope.
- Hazardous Materials Incidents—transportation, industrial, environmental, and terrorism.

Commercial Structure Fire, May 2023

FIRE SUPPRESSION

Community members called us to respond to 2,786 fires last year, an average of seven calls per day.

Property loss due to all structure fire incidents was an estimated \$224,786,003. Of note this year were several high-dollar total loss fires, including the estimated \$200,000,000 loss from a commercial fishing boat, a \$1,402,000 loss at a furniture store, and a \$1,215,000 loss at an auto body shop.

Estimated Loss					
	2019	2020	2021	2022	2023
Total Fire Loss	\$10,868,930	\$13,757,272	\$47,391,992	\$27,191,471	\$224,786,003
Property Loss Only	\$7,146,547	\$8,287,185	\$16,352,326	\$16,380,884	\$216,662,695
Fire Injury Civilian	9	24	22	15	16
Fire Fatality Civilian	0	3	4	1	5

Commercial Fishing Boat Fire – April 2023

EMERGENCY MEDICAL SERVICES

TFD has a long-standing history of providing the community with advanced life support (ALS) services. The first firefighters received paramedic training in 1973, and the department began transporting patients regularly in 1991. In 1994, the department started its in-house, nationally accredited paramedic program to train members of the department as well as professional firefighters from neighboring jurisdictions. In addition to classroom time, the program includes hospital/clinical rotations and fieldwork. Five paramedics were enrolled in the program (three from TFD and two from external departments) in 2023.

In 2023 firefighter/paramedics staffed five medic companies and completed 7,346 ALS transports. Firefighter/EMTs also staffed eight aid companies (three during peak hours) and transported 17,550 BLS patients to area hospitals.

<i>Incident Complaint Reported to Dispatch</i>	<i>Number of EMS Calls</i>	<i>Percent of Total EMS Calls</i>
<i>Chronic Illness/Medical Condition</i>	7,445	19.36%
<i>Falls</i>	4,528	11.78%
<i>Traffic/Transportation Incident</i>	4,215	10.96%
<i>Breathing Problem</i>	3,241	8.43%
<i>Unconscious/Fainting/Near-Fainting</i>	2,909	7.57%
<i>Traumatic Injury</i>	2,634	6.85%
<i>Chest Pain (Non-Traumatic)</i>	2,434	6.33%
<i>Psychiatric Problem/Abnormal Behavior/Suicide Attempt</i>	2,066	5.37%
<i>Overdose/Poisoning/Ingestion</i>	1,456	3.79%
<i>Convulsions/Seizure</i>	1,190	3.10%

SPECIAL OPERATIONS—HAZARDOUS MATERIALS

TFD’s Hazardous Material Team (Hazmat) responds to potential releases of hazardous materials to prevent, contain, or stop a release. The Hazmat Team also responds to confirmed or suspected incidents involving chemical, biological, radiological, or nuclear agents.

All Tacoma firefighters are trained to the Hazmat Operations level, with several certified to the Technician level. The Hazmat Team's core competencies include recognizing and identifying hazardous materials, response chemistry, environmental regulations, radioactive materials, toxicology, air monitoring and equipment, decontamination procedures, spill control/containment, and medical monitoring. The full Hazmat Team responded to 15 incidents in 2023.

TECHNICAL RESCUE

The TFD Technical Rescue Team provides the necessary skills and equipment to react quickly in extreme rescue situations. The team members are trained in the following five technical rescue disciplines:

- Rope Rescue
- Structural Collapse
- Confined Space Rescue
- Trench Rescue
- Technical Extrication

The Technical Rescue Team includes firefighters trained to the Technician level and supported by those trained to the Operations level. To become a Technical Rescue Technician, our personnel must complete approximately 250 hours of discipline-specific training. All technicians and operations-trained personnel complete monthly training, one shift each month, to maintain proficiency and increase efficiency and safety at technical rescue events. In 2023, the full technical rescue team responded to 22 technical rescue incidents.

Trench Rescue Multi-Agency Training October 2023

MARINE DIVISION

TFD's Marine Division fleet consists of a rapid response boat, the *Destiny*, and a 50-foot Metal Craft boat, the *Defiance*. In 2023, the Marine Division responded to 200 incidents, including 73 for the fireboat *Defiance*, and 127 for fireboat *Destiny*.

TACOMA FIRE COMMUNICATIONS

TFD operates an emergency communications center that handles calls from private alarm companies and the 9-1-1 system. In 2023, the Tacoma Fire Communications Center (TFC) dispatched over 90,000 fire companies to respond to more than 51,000 emergency calls.

TFC holds certification from the Association of Public-Safety Communications Officials (APCO) and adheres to the call processing time standards outlined in NFPA 1221. All dispatchers are certified as either emergency medical technicians or paramedics and receive the same level of fire operations training as field personnel.

Firefighter/dispatchers play a crucial role in incident outcomes. Working closely with field operations personnel, TFC adopts a "community member-centric" approach to decision-making. Leveraging Computer Aided Dispatch (CAD) and Automatic Vehicle Locator (AVL) technology, TFC promptly dispatches the nearest available resources to ensure community members receive optimal care and mitigate incidents efficiently.

SAFETY DIVISION

The Safety Division focuses on the health and safety of department members and aims to prevent accidents, injuries, illnesses, and fatalities through effective management, education, training, and programs. Staffed with five safety Lieutenants and two administrative safety officers, the division ensured the safety and accountability of emergency responders at various high-risk incidents throughout 2023.

FIREFIGHTER LOSS

	2019	2020	2021	2022	2023
Injury Loss - Firefighter*	21	46	25	59**	53
Life Loss - Firefighter	-	-	-	-	1

*On-the-job injuries that resulted in time loss **COVID exposures accounted for 27 of the 59 on-the-job injuries in 2022.

ADMINISTRATION BUREAU

WHO WE ARE

Under the leadership of Deputy Chief Bruce Bouyer, the Administration Bureau provides systems and infrastructure that support TFD operations and firefighters throughout their careers and maintains regulatory code functions.

WHAT WE DO

This bureau's responsibilities include Fire Prevention, Public Education, Fire and EMS Training, EMS Prevention and Outreach, Harbor Code Enforcement, Apparatus and Vehicle Maintenance, Departmental Human Resources, Facilities and Supplies, Public Relations, Volunteer Services, and Administrative Support.

September 11 Remembrance Ceremony

TRAINING

The Training Division trains all new firefighters and conducts in-service training for all department members. Its activities are driven by TFD's specific internal needs and the regulatory requirements of external agencies.

FIRE PREVENTION

The Fire Prevention Division (FPD) employs a multi-faceted approach to decrease the occurrence and severity of fires and other life safety incidents. This approach encompasses enforcement, permitting, inspections, engineering, and education.

New construction plans undergo thorough review to ensure compliance with fire and life safety codes regarding fire protection systems. Permits are issued for fire protection systems and other construction-related activities. Structures or high-risk activities, such as large public assemblies involving explosives, pyrotechnics, liquefied gas, and hazardous materials, are closely monitored through permitting and inspection.

Fire investigators play a crucial role in determining the origin and cause of all significant fires, aiding in preventing future incidents.

Live-Fire Training Prop – Training Center

HARBOR MASTER

TFD is responsible for enforcing the regulatory aspects of the City of Tacoma Harbor Code. In coordination with local marinas and Metro Parks, the TFD Harbor Master worked to identify possible derelict boats, illegally anchored boats, and unsafe vessels.

FIRE GARAGE

The Fire Garage is the vehicle maintenance facility responsible for repairing and maintaining all TFD ladder trucks, fire engines, medic/aid units, fireboats, and light-duty vehicles. Fire Garage personnel are also responsible for ordering, stocking, and delivering supplies to all TFD facilities via a messenger and supply delivery service and maintaining all small tools and equipment TFD uses.

FIRE BUFF BATTALION

The Tacoma Fire Buff Battalion was formed on November 23, 1986, with the primary mission of supporting firefighters engaged in firefighting activities.

The Tacoma Professional Firefighters Local #31 supports the Fire Buffs by facilitating donations from Tacoma firefighters to the Fire Buffs through voluntary payroll deductions. This money is used for insurance, upkeep of the support response vehicle, and food supplies.

The Tacoma Fire Buff Battalion is a member of the International Fire Buffs Association, an organization of local fire buffs clubs in many cities throughout the US and Canada. In 2023, the buffs assisted at 75 significant events, volunteering over 800 staff hours.

CHAPLAIN

In 2023, the Tacoma Chaplain Team provided in-person, on-scene crisis support for victims, emergency teams, and families needing emotional and spiritual support. Chaplain Dr. Russ Peters is an integral part of the support services provided by TFD. Dr. Peters leads a team of Chaplains, including Bob Reifsnnyder, Ed Jacobs, Hugh Milloy, Vanessa Miller, Jim Warnock, Sarah Keating, Dan O’Leary, Ron Wilson, and Sahara Chea. Each of our Chaplains completes a rigorous training program, is licensed or endorsed by their church, and continues their education through resources provided by the International Critical Incident Stress Foundation and International Federation of Fire Chaplains. Last year, the Chaplains from Tacoma Fire responded to over 200 calls for service, including fatalities, fires, and funerals. Our Chaplains also provide care for TFD personnel and are integrally involved with ways to support the staff and firefighters of TFD.

PERSONNEL HIGHLIGHTS

AL NEJMEH AWARD RECIPIENT

Captain Brett Stohr received the 2023 Firefighter Albert NejmeH Award for consistently demonstrating the award's core criteria, including being a role model, self-starter, mentor, team builder, promoter of wellness/fitness, and service to others. Congratulations, Brett!

From left to right: Chief Tory Green, Captain Brett Stohr

2023 ANNUAL AWARDS

The following employees were honored for exemplifying professionalism in firefighting, leadership, and teamwork.

Jen Vasquez, Non-Commissioned employee of the year

Dwight Snodgrass, Firefighter of the Year

Billy Jones, Fire Officer of the Year

Bruce Bouyer, Chief Officer of the Year

PERFORMANCE INDICATORS

RCW 35.103 FIRE DEPARTMENTS—PERFORMANCE MEASURES

The Washington State legislature requires city fire departments to set standards for addressing the reporting and accountability of substantially career fire departments and to specify performance measures applicable to response time objectives for certain major services. The arrival of first responders with automatic external defibrillator capability before the onset of brain death and adequate fire suppression resources before flash-over is critical during the mitigation of an emergency and is in the public's best interest. For these reasons, this section contains performance measures comparable to industry research relating to the organization and deployment of fire suppression operations, emergency medical operations, and special operations by substantially career fire departments. TFD's adopted performance benchmark goals and 2023 actual performance at the 90th percentile are the following.

TACOMA FIRE DEPARTMENT BENCHMARKS OBJECTIVES

TFD response benchmarks specify the minimum criteria needed to deliver fire suppression, emergency medical services, and special operations response effectively and efficiently. These response objectives are designed to protect the community members of Tacoma and the occupational safety and health of Tacoma firefighters. For this report, NFPA 1221: *Standard for the Installation, Maintenance, and Use of Emergency Services Communications Systems* (2021 edition), NFPA 1710: *Standard for the Organization and Deployment of Fire, EMS, and Special Operations* (2020 edition) were used as guidelines in the development of TFD response objectives.

Motor Vehicle Collision - May 2023

CALL PROCESSING TIME (DISPATCH)

This measure tracks the time elapsed from receiving a 9-1-1 call to completing the dispatch and directing firefighters to respond. Performance benchmarks are one minute and four seconds or less for priority calls for 90 percent of incidents. Times are based on TFD receipt of a call transfer from SS911 to dispatch.

2023 Calls to Dispatch

Dispatched As	Incidents	Goal 90%	Actual at 90%	% Meeting Goal	Average
Fire	332	1:04	1:58	60%	1:09
EMS	36,463	1:30	2:14	68%	1:24
Other	1,922	1:30	2:04	78%	1:05
Total	38,717	-	2:13	69%	1:23

TURNOUT TIMES

This measure tracks the time from receiving emergency notification to the beginning point of travel time to the incident. Performance benchmarks are one minute for priority EMS incidents and one minute and twenty seconds for priority fire and specialty incidents or less for 90% of incidents. The total count is greater than the number of incidents, as multiple units can be dispatched to one incident.

2023 Dispatch to Departure

Dispatched As	Turnouts	Goal 90%	Actual at 90%	% Meeting Goal	Average
Fire	2,585	1:20	2:32	47%	1:29
EMS	65,734	1:00	2:28	30%	1:26
Other	3,795	1:20	2:33	31%	1:39
Total	72,114	-	2:28	30%	1:27

TRAVEL TIME—FIRST ARRIVING UNIT

This measure tracks the time elapsed from when the company goes en route to arrival on the scene of an emergency incident. TFD travel time benchmarks for the first arriving company on the scene of a priority fire or EMS incident is four minutes or less for 90% of incidents. Note that a 20-minute travel time benchmark is currently associated with the marine response due to the variability in marine incidents.

2023 Departure to Scene

Dispatched As	Incidents	Goal 90%	Actual at 90%	% Meeting Goal	Average
Fire	290	4:00	6:43	52%	4:26
EMS	33,761	4:00	8:53	37%	5:23
Other	1,606	4:00	7:09	48%	4:36
Total	35,657	-	8:47	37%	5:20

TOTAL RESPONSE TIME

This measure tracks the time elapsed from when TFD receives a 9-1-1 call until the first unit arrives on a priority emergency incident scene. Total Response Time is the sum of 9-1-1 dispatch, turnout, and travel time and is considered industry best practice in performance reporting.

2023 Total Response Time

Dispatched As	Incident	Goal 90%	Actual at 90%	% Meeting Goal	Average
Fire	307	6:24	9:19	65%	5:57
EMS	34,079	6:30	12:55	35%	8:26
Other	1,617	6:50	10:08	59%	6:54
Total	36,003	-	12:46	37%	8:20

EFFECTIVE RESPONSE FORCE AT A STRUCTURE FIRE

The Tacoma Fire Department response time standard for the arrival of an effective response force with a minimum of 15 firefighters at the scene of a structure fire is 10:30 or less for 90 percent of incidents.

2023 Effective Response Force Response Times

Dispatched As	Incident	Goal 90%	Actual at 90%	% Meeting Goal	Average
Structure Fire	200	10:30	15:08	64%	10:40

PREDICTABLE CONSEQUENCES AND PLAN OF ACTION TO ACHIEVE COMPLIANCE

Given the current response time performance, the following are predictable results:

- As the population grows, we expect increasing demand for department services.
- We expect that response times will remain constant or slow, not meeting all our overall performance goals given our current level of resources.
- The geographical and road network challenges that delay travel time responses in Northeast Tacoma and the tideflats will continue until additional resources are added.

TFD’s action plan is to continue identifying and implementing operational efficiencies to offset unit availability. Examples include the concentrated effort to reduce non-emergency response. Our TFD CARES program intervention reduces high-utilizer participants’ use of the 9-1-1 system by about 90% annually. Our Holistic Outreach Promoting Engagement (HOPE) program provides an alternative response for those experiencing behavioral crises.

Holistic Outreach Promoting Engagement
